PRODUCT DESCRIPTION

The mouth-watering aroma of whole bird taste is prevalent in this Raw Roast. Each boneless breast and thigh combination is lightly seasoned, skin-on, netted and ready to cook. These turkey roasts are the choice of chefs for carving stations and picture-perfect presentations.

INGREDIENTS

Turkey Breast, Turkey Thigh, Water, Salt, Sugar, Sodium Phosphate

PREPARATION & COOKING INSTRUCTIONS

Butterball recommends thawing individual roasts in their original packaging, in a refrigerated environment, for 48 hours. Remove thawed roast from the plastic overwrap bag, do not remove the net. In a shallow pan, place the roast in a convection oven preheated to 325 degrees F. Cook the roast for approximately 2.5 hours or 15 minutes per pound. For a conventional oven, preheat the oven to 350 degrees F for and cook the roast for approximately 3.0 hours. Remove the roast from the oven when it reaches 160 degrees F and let it "rest" for 30 minutes before slicing or carving.

Per Tyson their PFS documents do have the signature and title of an authorized person from their company. If the product is CN labeled, then the label is all that is required (they do not sign and title them since they are on the master case). Please see attached letter from USDA.

I am sure that is not the answer you were looking for but unfortunately they are not able to sign the CN labels. PFS will always be signed and dated though.

TIP Sheet for Accepting Processed Product Documentation

CN Labels, factsheets, and product labels provide a way for food manufacturers to communicate with school program operators about how their products may contribute to the meal pattern requirements for meals served under the Department of Agriculture's (USDA) Child Nutrition (CN) programs. Below are tips for acceptable documentation:

CN Labeled Products

- The CN Label provides a warranty against audit claims when the product is used according to the manufacturer's direction.
- School program operators may submit an original CN Label, a photocopy or a photograph of the valid CN Label during an administrative review as acceptable documentation.
    - ✓ CN Labels that are laser printed on the product carton or cannot be easily removed may be photocopied while attached to the original product carton; or
    - ✓ A photograph of the CN Label while it is attached to the original product carton.

    (CN Labels that are photocopied or photographed must be visible and legible.)
- When a valid CN logo and crediting statement is provided, State reviewers **must not** request a Product Formulation Statement.

Watermarked CN Labels

- If the actual CN Label, photograph or photocopy of the valid CN Label is not available, school program operators may provide the Bill of Lading (invoice) containing the product name **and**:
    - ✓ A CN Label copied with a watermark displaying the product name and CN number; or
    - ✓ An electronic copy of the CN Label with a watermark displaying the product name and CN number provided by the vendor.

Product Formulation Statements (PFS)/Other Documentation

- PFS must be on signed letterhead that demonstrates how the processed product contributes to the meal pattern requirements.
- Templates for documenting the meat/meat alternates (M/MA), grains, fruits, and vegetables components are available on the FNS website at: http://www.fns.usda.gov/cnlabeling/food-manufacturersindustry.
- PFS may be modified for various products contributing to more than one meal component. For example, a cheese pizza may credit towards the M/MA, grains and the red/orange vegetable subgroup. The crediting information for each meal component may be documented on the same PFS.
- Creditable ingredients listed in the PFS must match a description in the *Food Buying Guide for School Meal Programs* available at: http://www.fns.usda.gov/tn/food-buying-guide-school-meal-programs.
- PFS should verify that the product's contribution to the meal pattern requirements is not greater than the serving size of the product (i.e., a 2.15 ounce beef patty may not credit more than 2.00 ounce M/MA).
- PFS should assure that the creditable components are in the finished product.

Farm cured to sweet perfection. Curing is nature's way of putting the sweet in sweet potatoes. That's why all of our sweet potatoes are naturally cured right on the farm. Held under exact heat and humidity levels, the starches convert to sugars and they get sweeter naturally. At the peak of sweetness, they're ready to become Simplot Sweets.

Serving Size: 1/2 cup (130g)

I. Vegetable Component

Please fill out the chart below to determine the creditable amount of vegetables.

DESCRIPTION OF CREDITABLE INGREDIENT PER FOOD BUYING GUIDE (FBG)	OUNCES PER RAW PORTION OF CREDITABLE INGREDIENT	MULTIPLY	FBG YIELD[1]	DIVIDE	PURCHASE UNIT IN OUNCES	CREDITABLE AMOUNT[2] (QUARTER CUPS)
		x		÷		
		x		÷		
		x		÷		
Total Creditable Vegetable Amount:						

[1] FBG yield = either Servings per Purchase Unit Column or Additional Information Column, as applicable.

[2] FBG calculations for vegetables are in quarter cups. See Attachment C for quarter cup to cup conversions.

- Vegetables and vegetable purees credit on volume served. Tomato paste and puree will continue to credit as a calculated volume based on the yields in the FBG.
- At least ⅛ cup of recognizable vegetable is required to contribute towards the vegetable component.
- Please note that raw leafy green vegetables credit as half the volume served in the Child and Adult Care Food Program (for example: 1 cup raw spinach credits as ½ cup dark green vegetable). Legumes may credit towards the vegetable component or the meat alternate component, but not as both in the same meal. The Program Operator will decide how to incorporate legumes into the meal. However, a manufacturer should provide documentation to show how legumes contribute towards the vegetable component and the meat alternate component. See chart on the following page for conversion factors
- The PFS for meat/meat alternate may be used to document how legumes contribute towards the meat alternate component.

I certify the above information is true and correct and that ________ ounce serving of the above product contains

________ cup(s) of vegetables.

II. Fruit Component

Please fill out the chart below to determine the creditable amount of fruit.

[1] FBG yield = either Servings per Purchase Unit Column or Additional Information Column, as applicable.

[2] FBG calculations for vegetables are in quarter cups. See Attachment C for quarter cup to cup conversions.

- Please note that dried fruits credit as double the volume served in the Child and Adult Care Food Program. (For example, ½ cup raisins credits as 1 cup fruit).

I certify the above information is true and correct and that 4 ounce serving of the above product contains 1/2 cup(s) of fruit.

Quarter Cup to Cup Conversions*

Butter Buds® is 100% natural – made with real butter from Wisconsin. All the flavor components of butter have been captured to give unequaled flavor and performance.

Through a patented process, the flavor of butter is released and spray dried into powdered form. Butter Buds is concentrated, too. One pound of Butter Buds equals the flavor of eight pounds of butter. One case equals the flavor of 48 pounds of butter. Yet, Butter Buds requires no refrigeration, is easy to store and use, and delivers great natural butter flavor.

Use Butter Buds in cooking and baking, and as an ingredient in your recipes. Mixed with water, Butter Buds makes a rich, natural butter flavored sauce that you can pour over vegetables, baked potatoes, rice, noodles, fish, etc. Used in a dry or liquid form, it imparts richness and flavor to mashed potatoes, casseroles, sauces, desserts, soups and many other dishes.

January 10, 2023

Dear Valued Customer,

Effective January 1, 2023, in accordance with the Food Allergy Safety, Treatment, Education, and Research (FASTER) Act, all food products containing sesame are required to have sesame listed in the ingredients statement or in a separate allergen statement. To ensure compliance, our Flowers branded and institutional products will all be labeled to reflect the following adjustments:

- **Buns/Rolls/Hoagies/Dinner Rolls:** All non-sesame seeded buns (branded, private label, and *foodservice*) – *except Canyon Bakehouse* – will contain a minute amount of sesame flour in the flour mix – approximately 0.031%. As a result, sesame will be listed as an ingredient under the "less than 2%" section on packaging. Additionally, sesame will be added to a separate "contains" allergen statement on the packaging and labeling (where applicable).
- **Bread:** All loaf breads (branded, private label, and foodservice) – *except Dave's Killer Bread* – will not contain sesame. Packaging will include a voluntary precautionary allergen statement: "Manufactured on shared equipment that also processes products containing sesame. May contain sesame."

Food safety is a top priority at our bakeries, and we operate with the utmost care for our consumers. We also remain committed to responsible allergen management and strict compliance with clear labeling. If you have any questions, please contact your Regional Sales Manager.
